# The Original Mobile Security Box

The equipment shown in this brochure  
is for reference only and is not included!

## About TelescopicMast

TelescopicMast provides advanced mobile surveillance towers, catering to evolving security needs. Based in the Netherlands with a growing U.S. presence, it ensures swift support and access to its flagship, the Mobile Security Box. Adjustable from 13 to 30 feet, this solution enhances surveillance for sites and events. Designed for U.S. compliance, it enables quick deployment and integration with major security technologies.

## Towers vs Trailers

Mobile surveillance in the U.S. mainly relies on trailers, but TelescopicMast offers an alternative. The choice depends on deployment speed, transportability, and security.

### *Deployment*

Trailers are ideal for frequent relocation, while towers suit long-term, stationary use.

### *Transportability*

Trailers offer mobility but can be costly if underutilized. Towers, with a smaller footprint, reduce long-term logistical costs.

### *Security*

Towers resist theft with anti-climbing features and are harder to tamper with.

Though trailers dominate, towers provide a secure, cost-effective option for extended deployments.

## Transporting your Mobile Surveillance towers

Traditional surveillance trailers add unnecessary costs and complexity. TelescopicMast offers a smarter, cost-effective solution by using trailers solely for transport, eliminating bulky on-site components. This reduces clutter, lowers costs, and allows investment in better equipment.

Designed for single-person operation, these trailers ensure precise positioning on any terrain. With hydraulic lifting, shock absorbers, and a galvanized chassis, they provide durable, efficient, and reliable security deployment for any environment.

## Contact

For more information on TelescopicMast's surveillance towers and transportation solutions, contact Gawain Guedry. As a trusted expert in security deployments, he can provide tailored solutions to meet your specific needs.

## Three applications

### *Securing critical infrastructure*

Protecting utilities, oil and gas facilities, and hydroelectric plants is vital to national security. These sites face threats like vandalism, theft, and terrorism, requiring adaptable security solutions. Mobile security towers provide rapid deployment and elevated surveillance, reducing blind spots and intrusions while ensuring 24/7 monitoring.

### *Construction site security*

Construction sites are prime targets for theft and vandalism, with millions lost annually due to stolen materials and equipment. Mobile security towers act as a visible deterrent and adaptable surveillance solution. Equipped with high-visibility cameras, motion-activated lighting, and remote monitoring, they prevent unauthorized access and minimize financial losses.

### *Border security*

Border security requires constant monitoring over vast areas, where traditional methods fall short. Mobile security towers enhance surveillance with AI, thermal imaging, and long-range sensors, cutting undetected crossings by 40% in a U.S.-Mexico border pilot. By automating surveillance, these towers ease staffing shortages and enable personnel to focus on key enforcement. Their rapid deployment strengthens security at checkpoints and remote areas, while their mobility ensures adaptability to evolving threats, making them a cost-effective, scalable solution.

## Build it to your needs

TelescopicMast's rapid deployment towers give American security specialists flexible equipment integration and reliable power for uninterrupted surveillance. Supporting fixed, PTZ, and hybrid cameras with AI analytics, motion detection, and thermal imaging, they ensure 360-degree coverage and seamless brand compatibility. Ideal for remote sites, they offer mains power with battery backup, solar panels for sustainability, and methanol or hydrogen fuel cells for extended operation. Combining advanced surveillance with versatile power, TelescopicMast delivers dependable security anywhere.

## ANSI approval

TelescopicMast's surveillance towers are proudly ANSI certified, meeting stringent U.S. safety, performance, and durability standards for security operations. Alongside their existing CE and TÜV certifications, these towers ensure global compliance with rigorous safety benchmarks, including exceptional structural integrity and wind resistance. Trusted by law enforcement and critical infrastructure professionals alike, TelescopicMast towers are engineered to withstand the harshest environments while delivering reliable, high-performance surveillance you can depend on.

### **MSB6-Premium**

The MSB6-Premium is a heavy-duty mobile security mast ideal for unmanned sites and temporary installations. Its almost 20 feet tall mast offers excellent visibility, while roof climb protection prevents unauthorized access. Four extendable stabilizers ensure stability in winds up to 58.4 mph, and its lockable, vandal-resistant cabinet secures equipment. Compatible with various surveillance technologies, it supports solar panels or fuel cells for autonomous operation.

### **MSB-Premium XL**

The MSB-Premium XL is a high-performance mobile security mast ideal for large-scale surveillance. Its almost 30 feet tall, 5-part telescopic mast provides a superior vantage point for wider coverage. Key USPs include a reinforced heavy-duty ground frame for maximum stability, custom branding capability for professional deployment, and high wind resistance, ensuring reliable operation in harsh weather conditions.

Features MSB6 – Premium   MSB – Premium XL		Specifications	MSB6 – Premium	MSB – Premium XL
Mobile unit easy to transport to site		Transport size (LxWxH)	3.31 x 3.31 x 7.68 ft	3.74 x 3.74 x 8.2 ft
Easy to store				
Heavy duty ground frame	Required extended floorspace (LxW)		66.1 x 66.1 inch	76.4 x 76.4 inch
Easy to install by one engineer				
4 sided heavy duty forklift slots, for easy transportation		Weight	917.1 lbs	1106.7 lbs
Lifting eyes, for easy transportation and deployment				
Stable heavy duty telescopic mast	Total height with extended mast		19.7 ft	29.5 ft
Automatic safety stop				
Multifunctional masttop bracket; design your own solution.	Adivised maximum weight in masttop		132 lbs	132 lbs
Four spoke masttop for CCTV cameras or floodlight				
Spirit level for easy installation				
Two lockable doors to secure equipment				
Two locks per door	Maximum windload with stabilizers		53 mph	53 mph
Prepared for additional security padlock				
Cable nest keeping the cable chain in place	Manual CE approved winch		1212 lbs	1874 lbs
Gas dampened door spring				
Completely closed due to 2 Lockable top covers	Steel galvanized construction		yes	yes
Roof climb protection				
Patchbox prepared	Steel galvanized mast		4-part	5-part
4 stabilizing cables, reducing vibration and false alarms.				
Stabilized by 4 stabilizers	Premium telescopic mast		4.72-3.94-3.15-2.36 inch	4.72-3.94-3.15-2.36-1.57 inch
Sides suitable for branding with logo's or messaging				
Double cabling in mast (safer for people and equipment)	Certifications		ANSI	ANSI
Sufficient space for installing batteries or fuel cells			CE / ISO9001 / TÜV	CE / ISO9001 / TÜV
Hoisting mast RVS316 stainless steel cables				
Hydraulically pressed cable clamp				
Manual included				
Warning labels				
Nylon wheels with bearings
